Mikita Besau

Front End Developer

WORK EXPERIENCE

Antelis Electronics, Minsk, Belarus
Hardware and software developer for GPS vehicle tracking with customers all over Belarus

Front End Developer   11/2023 – 10/2024

- Participated in the developing of a GPS tracking system with vehicle management, filtering and an interactive map displaying real-time locations, routes, and points of interest. Ensured seamless user experience and efficient data visualization.
- Developed a modern business website with a responsive design, ensuring smooth functionality and an optimal user experience across various screens.
- Designed front-end code using HTML, CSS, TypeScript, React, React Native to create responsive web applications that works across desktops, tablets, and smartphones.
- Fixed bugs and optimized site performance, significantly reducing page load times and eliminating random freezes.
- Developed tests using Jest to prevent bugs and enhance the maintainability of the website, ensuring higher code quality and reliability.
